

Wrinkle Reduction

The Matrix IR Wrinkle Reduction procedure, featuring the revolutionary Fractional technology, heats the connective tissue within the targeted treatment area. This stimulates collagen production and produces a firming effect in sagging skin. Mild to moderate wrinkles are resolved and skin texture becomes smoother and more elastic. Wrinkle Reduction is a safe and effective solution for all skin types without downtime.

Most patients start to notice improvement of wrinkles between 2-3 treatment sessions. Some patients note improvement even after the first treatment. The total number of required treatment sessions depends on your skin's condition. Schedule a consultation to establish your personalized treatment schedule.
